# Dominik Ślęczka

Software Developer | R/Shiny | LLM & Agentic Systems

dominik.jan.sleczka@gmail.com +48 792760656 Warszawa, Polska

## Summary

**Looking for a Software Engineer** role where I can design and deliver production-grade applications in client-facing environments.

Experience-wise, I bring 6+ years of software development in pharma and biotech, with recent focus on LLM applications: acting as Product Owner for an LLM-powered document transformation platform at a major pharmaceutical company, and building agentic systems using prompt engineering and multi-step reasoning. I worked in R and Python and have hands-on experience integrating APIs, full stack development with deployment on AWS.

## Skills

**AI & LLM:**

Prompt Engineering, RAG, Agentic Systems, Embeddings

**Python:**

langgraph, strands, boto3

**Infrastructure:**

AWS, SQL, Docker, Git, Pulumi

**R:**

shiny, tidyverse

**Soft Skills:**

Stakeholder Communication, Product Ownership, Agile

## Experience

**Ardigen** Remote

04/2022 – 04/2026

Software Developer II 06/2024 – 04/2026

- Product Owner for an LLM-powered document transformation platform for a major pharmaceutical company - automating a process previously handled by an external agency. Defined product requirements for the LLM+RAG pipeline, led prompt architecture design, coordinated a cross-functional development team in an agile workflow, and navigated pharmaceutical regulatory and compliance requirements throughout delivery
- Built a business development agentic system that autonomously identifies prospect companies, researches related publications and activity, and drafts outreach tailored specifically to potential customers, grounded in each prospect's scientific work
  - Stack: strands, pulumi, boto3, AWS Bedrock Agentcore
- Full-stack R/Shiny development for pharmaceutical research teams, delivering interactive tools for complex scientific workflows

R/Shiny Developer 04/2022 – 05/2024

- End-to-end delivery of an R application for a major pharmaceutical company, allowing monitoring and development of large-scale scientific experiments:
  - R/Shiny application set up in AWS environment with Postgres DB
  - Integrated REST API service for background processing
  - Implemented and optimized complex calculations
  - Data visualization of scientific reports
  - Stack: R, shiny, tidyverse, plumber, Postgres, plotly, ggplot

**Performance Media** Warszawa, Polska

Data Science Developer and Analyst 04/2020 – 03/2022

- Developed R Shiny dashboards backed by REST API workers, delivering actionable marketing performance insights to business stakeholders
- Built and maintained backend ETL pipelines transforming raw ad platform data into structured analytical datasets
- Collaborated with analysts to translate business questions into data products

**Baxter International Inc.** Warszawa, Polska

Pricing Data Analyst 12/2018 – 03/2020

- Developed pricing dashboards and analytical tools used by commercial and finance teams (R, VBA, MS-SQL)
- Automated recurring reporting workflows, reducing manual effort and improving data accuracy across the region

**Ash Dunne**

Scientific Director @Merck KGaA

"Working with Dominik has been a pleasure. He has been leading the development of an important AI platform and I have been impressed by Dominik's professionalism and capabilities. He remains very calm and is excellent at finding solutions to problems.

I would happily recommend working with Dominik." via LinkedIn recommendation

**Aleksandra Błażejewska**

Delivery Manager @Ardigen, PMP

"Dominik is a very good R/Shiny developer[...] He communicates with clients perfectly: with calm and to the point. He was playing the Product Owner role and did it really great." via LinkedIn recommendation
